## UNLOCK ECO-FRIENDLY ENVIRONMENT WITH SMART LOCK SOLUTIONS IN HOTELS

The Vision of Intelligent IoT Powered Technology have Arrived...

- Stylish modern design
- Deploy rechargeable lithium battery
- Long batteryThe Vision of Intelligent IoT Powered Technology have Arrived... ..
- life cycle
- Long usage per full charge
- No battery waste, environment friendly
- Support various unlock feature options:
  - Face recognition c/w peep hole viewer
  - Biometric fingerprint
  - Smart card/magnetic card/Mifare card/RFID card
  - Password
  - Contactless mobile App
  - Mechanical key
  - Online monitoring at centralize dashboard

## ABOUT US

GUEST CONTROL SYSTEMS LIMITED was founded on a vision to innovate integrated SMART solutions for the Hospitality Industry. GUEST CONTROL SYSTEMS LIMITED brings to its position as an advance integrated SMART solutions design and development company a rich heritage of innovation and technological advancement. Today, GUEST CONTROL SYSTEMS LIMITED has moved well beyond the role of traditional solution development and has been focusing on creating total vertical industry applications that can help the vertical industry to reduce their capital expenditure, operation expenditure while improving their revenue and bottom line performance. The result is a unique market niche highlighting the company's ability to offer its portfolio of applications and solutions at lower cost, increased reliability with value added advantages. GUEST CONTROL SYSTEMS LIMITED solutions are at works in thousands of hospitality and vertical enterprises extended across the globes including those prestigious fortune 500 companies. It is this level of experience and performance that has positioned the company in a place of prominence as it continues to expand its solutions portfolio to meet the challenging hospitality and vertical industry market needs.

# INTRODUCTION

Access management is an important part of every hospitality business. Today’ s smart locks are known for their versatile ways to unlock: passcodes, fingerprint, physical key, IC card and smartphone. Of all these methods, IC card is most commonly seen in hotels. However, doors in hotels are about to be upgraded in the age of Internet of Things (IoT), allowing guests to unlock the doors using their smartphones. Smart locks are quickly becoming an industry standard, with many brands planning to make mobile key requirement as mandatory. This technology is also transitioning to a standard property requirement, guests will begin seeing more independent and regional hotels offering mobile key in the coming years, and not only at the large global brands. Hotels are offering guests an all-encompassing solution that allows them to access multiple property services, from booking to room service to mobile access, within a single application that streamlines the guest experience. The trend toward engagement with guests via the mobile device will only grow over the next several years. Guests will continue to demand more control and hotels will continue to provide solutions that give them options in the palm of their hand.

## CUSTOMIZATION SERVICES

We live in a world where everyone wants it “their way,” and people expect businesses to deliver custom options. Today’ s customers expect the ability to customize anything and everything to fit their individual preferences.

At Guest Control Systems Limited, our uniqueness and market differentiation is we provide services to enable customer to customize their smart door lock and its applications according to their needs and preferences. Smart door lock and its application personalization is an essential element in delivering tailored customer experiences to different segments of users. It is the key to driving customer loyalty and increasing customer satisfaction.

**We also provide integration services to integrate the smart door lock with other technology sub-system to form a unique solution to meet the individual customer specialize application.**

## SMART DOOR LOCK HIGHLIGHTS

As technology continues to evolve, smart door locks have become an increasingly popular alternative to legacy methods, offering secure, convenient and contactless experience. The evolution of hospitality access over the years demonstrates how technology is constantly changing, improving guest experience and streamlining operations.

Smart door lock incorporates on-line feature collects data from its electronic door locks, which may be used to optimize operations, protect guest safety and ensure proactive door lock service that supports a positive guest experience. Online locks capture and record a great deal of nonpersonal operating data, which results in predictive maintenance and continuously monitors guest door status to enhance hotel security. The more intelligence that is built in a lock system, the more operators learn about their hotel, the guest experience and the lock’ s performance. The usage profile of each lock provides data that supports better decision-making, It can also help reduce operator maintenance costs and improve customer satisfaction. Networked electronic door locks are an important part in the expansion of artificial intelligence (AI) in hotel operations

Smart door locks and room access automations not only serve hotel guests but also help manage the team’ s time more efficiently. Using smart locking systems together with other guest experience technologies helps hotels implement high-tech low touch strategy.

Smart locks are quickly becoming a necessity for hotels and property managers, looking to stay competitive and up to date.

## OTHER APPLICATION ENVIRONMENTS

**Other than applications in hospitality environment, Guest Control Systems Limited full portfolio of smart door locks are also suitable for applications in other areas:**

HOSPITALITY

HEALTHCARE

ASSISTED LIVING

SERVICE APARTMENT

CONDOMINIUM

DOMITORY

COMMERCIAL COMPLEX

HOME

# BENEFIT OF SMART DOOR LOCKS

Smart locks offer a host of benefits over traditional, mechanical key locks. Aside from being a more secure way to manage access and make a good first impression for guests, smart locks give hoteliers greater control of their properties from anywhere.

No more lost keys. Smart locks enable hoteliers to leverage unique, self-expiring access codes for each guest that only works for the duration of their stay. Guests can use the same access code to access their room as well as shared amenity spaces such as a swimming pool, gym, or business center.

Provide a completely contactless experience. Hoteliers can streamline check-in and check-out, and promote personal safety by limiting contact with their guests. Guests can receive their access code in advance and go straight to their rooms without visiting the front desk.

Remote operations – your staff will be able to access information from the front desk, meaning

that your staff will notice unauthorized entry attempts more quickly. Your team will also enable and disable access remotely from the front desk without having to send a member of staff to intervene.

Integrations – your door locks can be integrated with other security features such as a video camera feed, allowing easier identification of potential security incidents. Having video analytics will also make it possible for alerts to be triggered when incidents occur so that security staff will monitor the security feed more effectively.

Knowing where your guests are – in the event of an emergency evacuation, you will have a detailed account of the location of all guests to ensure that nobody is left inside the building.

In addition to time savings, smart locks can be integrated with other smart tech in the rooms. For example to turn off the heating and lights when a guest leaves, etc.

## OUR COMMITTMENT

Guest Control Systems Limited is committed to deliver innovative state-of-the-art hospitality robotic technology to the hoteliers all over the world.

With the company team expertise and accumulated global experience in AI, we are able to set standard for hospitality robotic products and solutions.

We create lead in innovation to ensure the hoteliers are at the forefront of technology. We ensure your hotel are at world-class status while we care for your service optimization, process efficiency, deliver outstanding guest experience, guest loyalty and profitability.
