WiFi Solutions for Connected Warehouses and Smart Factories

BUILDING A ROBUST WIFI NETWORK FOR WAREHOUSING & MANUFACTURING

CONNECTED WAREHOUSE WIFI, AUTOMATED GUIDED VEHICLE
AND ROBOTICS WIFI, WIDE WIFI COVERAGE FOR MOBILE DEVICES
WAREHOUSE & MANUFACTURING WIRELESS CCTV SURVEILLANCE

Robust and strong WiFi coverage is paramount for connected warehouses that require uninterrupted internet connectivity. We offer wide coverage WiFi networks to meet the growing demand for connected warehouse and manufacturing applications.

WHY A STRONG WIFI COVERAGE NETWORK IS CRITICAL?

HARD FACTS

Connected and automated factories are essential for gaining a competitive edge in the warehouse and manufacturing industries. Smart forklifts, real-time mobile scanners, and IoT devices rely on a stable, robust, and extensive WiFi infrastructure to ensure seamless, reliable connectivity at all times across all operational touchpoints.

- **TABLETS AND HANDHELD DEVICES** – This helps improve accuracy and efficiency significantly. It helps in reducing paperwork and streamlines real-time data processing.
- **AUTOMATED GUIDED VEHICLES** – Reduce manpower dependency by automating material handling, boosting efficiency in repetitive logistical transport tasks.
- **INDUSTRIAL IOT** – Equipping connected factories with advanced sensors that collect and analyze data to improve overall productivity and enable smarter operational decisions.
- **ROBOTICS** – Smart machines and robots increase accuracy and minimize production errors through consistent, high-speed precision work.
- **WIRELESS SURVEILLANCE** – Enhance warehouse security with smart CCTV cameras connected to broadband wireless network.

Aglotel's integrated Wi-Fi and wireless network offers high-capacity broadband infrastructure designed for large-scale warehouses. With over 30 years of experience, we specialize in delivering top-tier Wi-Fi solutions for factory environments, ensuring reliable, high-performance connectivity.
