POWER

**UNLOCK THE POWER OF WIRELESS  
CHARGING IN HOSPITALITY**

*A Mandatory Technology Shaping the Hotel Future*

## Introduction

As more and more people rely on their mobile devices for both personal and business use, the demand for convenient and accessible wireless charging solutions continues to grow. In response to this need, many hotels are turning to wireless Qi charging technology as a game-changing solution and a "must have" in guestrooms. Wireless charging is practical, reliable and ease-of-use.

Table Top Wireless Charging Mouse Pad

## Wireless Charging in Hotel Guestrooms

**Guest Control Systems Limited** offer stand-alone **Pownovo™ Series** wireless Qi charging pads that can be placed on any flat surface, such as bedside table or writing desk. Not only the charging pad serves as a protective layer on the furniture, the charging pad provides fast and convenient wireless charging option to the hotel guests. It can also enhance the overall guest experience by adding a touch of style and sophistication to the room.

**Pownovo™ Series** wireless Qi charging is not only simple, it's cost efficient. There are no exposed electrical connections to wear out or break, and charging pads are also watertight with no moving parts. This makes them hygienic and robust.

## Benefits of Wireless Charging

### Convenience:

**Pownovo™ Series** Wireless Qi charging allows guests to charge their devices quickly and easily without the need for cables or power outlets. Instead, they simply place their compatible device on the charging pad to start charging. This convenience is especially beneficial for guests who may be in a hurry or who have forgotten their charging cables.

### Less clutter:

With **Pownovo™ Series** wireless Qi charging, there is no need to keep track of multiple cords and cables, which often get lost or broken. A single mobile wireless charger replaces them all, making wireless charging a popular choice for hotel guestrooms.

### Extending battery life:

Lay your smartphone on the **Pownovo™ Series** wireless Qi charger whenever you have a few minutes to give its battery life a quick boost.

### Compatibility:

**Pownovo™ Series** Wireless Qi charging is compatible with a wide range of mobile devices, including smartphones, tablets, and smartwatches. This means that guests do not need to worry about bringing their own charging cables or adapters, as the charging pad will work with their device regardless of its charging port.

### Safe connections:

As all **Pownovo™ Series** wireless Qi charging takes place inside the phone, there's no risk of corroded USB ports, reducing the risk of charging errors or electrical faults. You also never need to worry about electrical problems caused by third-party charging cables, which can be less than reliable.

### No Wear and Tear:

Plugging phones into power cable regularly increases the risk of damaging phone ports, which can lead to costly repairs. With **Pownovo™ Series** wireless Qi charger, There is no issue of damaging phone port.

### No Risk of Overheating:

Once a Qi-compatible phone is fully charged, it turns off the **Pownovo™ Series** wireless charger, saving energy and preventing the battery from overheating.

### Aesthetics:

**Pownovo™ Series** Wireless Qi charging pads can be incorporated into the design of hotel furniture or accessories, creating a sleek and modern look that is both functional and stylish. For example, charging pads can be laid on bedside tables or writing desk, making them a seamless part of the hotel room décor.

### Cost Effectiveness:

While installing **Pownovo™ Series** wireless Qi charging technology may seem like a significant investment, it can actually be a cost-effective solution in the long run. By providing guests with a convenient charging option, hotels can reduce the need for additional power outlets and charging cables, which can save money on maintenance and replacement costs over time.

Power=15W

Charging Area=70mm x 70mm

## Wireless Charging Contact Area

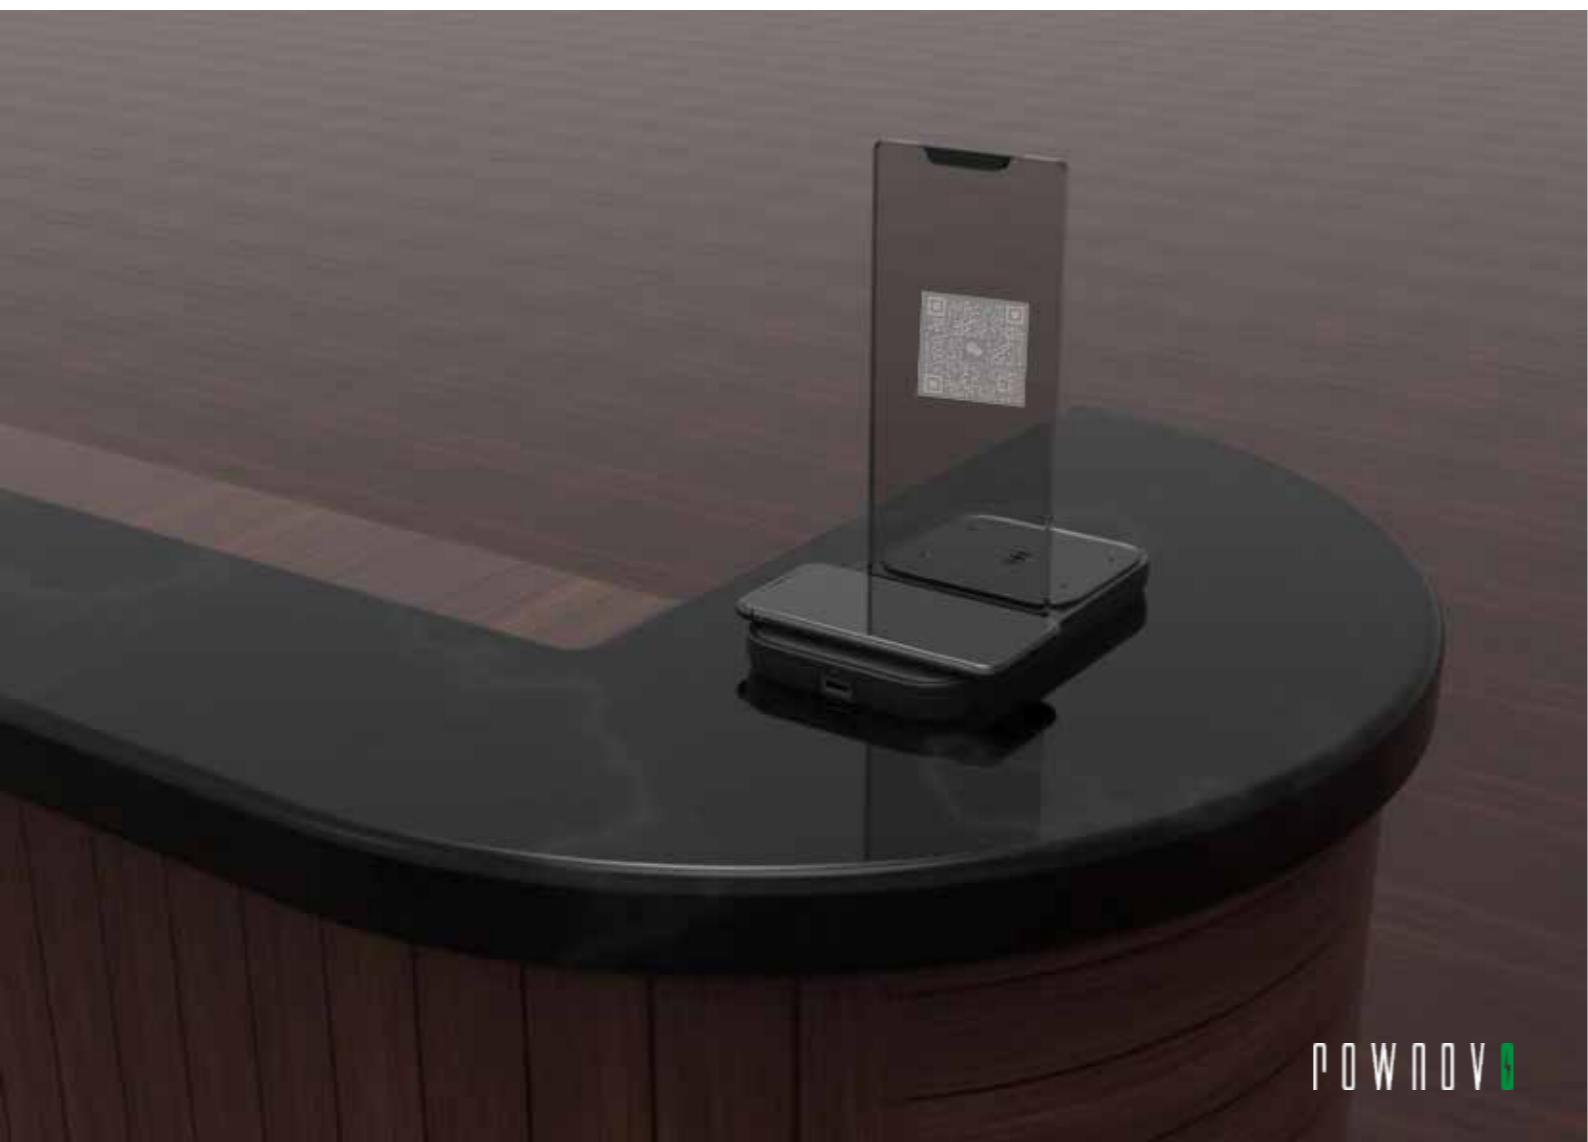

Wireless charging contact area depend on the size of the charging coil used in the product.

**Guest Control System Limited** uses wide area charging coil with a coverage area is 70mm x 70mm to ensure guest can place their smartphone on the charging spot with ease And minimum error, especially when the guest is in a rush.

The wide area charging coil use by **Guest Control System Limited** further guarantee the product reliability and accuracy

## Conclusion

**Guest Control Systems Limited Pownovo™ Series** wireless Qi charging technology is transforming the hotel experience by providing a convenient, compatible, and aesthetically pleasing charging solution for guests.

The Qi wireless standard enjoys wide industry support and the **Wireless Power** Consortium enforces strict certification procedures. This ensures that all Qi-certified charging products are built to high standards of safety and are compatible with all Qi-certified devices.

By offering wireless Qi charging, hotels can improve guest satisfaction, reduce maintenance costs, and stay ahead of the competition in an increasingly tech-savvy world. Whether through stand-alone charging pads or integrated solutions, wireless Qi charging is a game-changing technology that is mandatory in any hotel rooms.

### Other Application Areas in Hotels

There are numerous places where wireless charging can improve the guest experience. Besides hotel guestrooms, **Guest Control Systems Limited Pownovo™ Series** Wireless Qi charging can be installed in hotel lobbies, where guests often linger to check in/out, meet with friends or catch up with work. Similarly, adding charging pads to counter tops in bars and restaurants gives visitors the ability to top up their devices as they drink and eat. Other venues include conference rooms, business centers, etc.
